Index

Volume 9 Subject Index 2000

1045 steel
Electron Microscopy Structure Study of Laser-Clad TiC-Ni Particle-Reinforced Coating 9,2; 234-246

15-5 PH steel
Anelastic Deformation Measurements in Structural Engineering Alloys 9,4; 463-466

2.25 Cr-1.0Mo steel
Carbide and Hardness Development in the Heat-Affected Zone of Tempered and Postweld Heat-Treated 2.25Cr-1Mo Steel Weldments 9,5; 477-488

2024 (AlCu4Mg1)
An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9,3; 266-271

26Cr-2Mo-1.6C steel
An Optimal Heat Treatment Cycle for a 26Cr, 2Mo Stainless Steel 9,3; 261-265

3Cr-Mo-V steel
Kinetics of Plasma Nitriding and Renitriding of 3% Cr-Mo-V Steel 9,4; 457-462

acrylics
Reactive Magnetron Sputtering of Indium Tin Oxide Films on Acrylics—Electrical Resistivity and Optical Properties 9,4; 424-427

activated diffusion brazed
Effect of Mechanical Properties Using Different Filler Metals on Wide-Clearance Activated-Diffusion-Brazed Ni-Based Superalloy 9,6; 663-668

active medium
On the Initial Stage of Plastic Deformation of Metal Alloys 9,2; 170-173

additive metal
Effect of Mechanical Properties Using Different Filler Metals on Wide-Clearance Activated-Diffusion-Brazed Ni-Based Superalloy 9,6; 663-668

admixture
Corrosion Control of Steel-Reinforced Concrete 9,5; 585-588

aging
The Jominy End Quench for Light-Weight Alloy Development 9,4; 408-415

AISI 301
Use of Stainless Steels in Bus Coach Structures 9,6; 669-677

AISI 430
Use of Stainless Steels in Bus Coach Structures 9,6; 669-677

Al 5083 alloy
The Degradation of Corrosion Resistance for Al 5083 Alloy after Thermal and Superplastic Forming Processes 9,3; 253-260

Al and Al (Mn) alloys
Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358

Al-12.1% Zn
Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401

Al-Cu-Mg alloy
Effect of Delayed Aging on Mechanical Properties of an Al-Cu-Mg Alloy 9,1; 24-27

Al-Cu-Si alloys
Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221

Al-Li alloys
An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9,3; 266-271

Al-Si-Mg alloys
Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221

alloy 6061
Recrystallization Behavior of Rolled Ingots of 6061 and 6069 Aluminum Alloys 9,4; 416-423

alloy 6069
Recrystallization Behavior of Rolled Ingots of 6061 and 6069 Aluminum Alloys 9,4; 416-423

alloy 7075-T6
An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9,4; 441-448

alloy A356
A Study of Thermal Parameters and Interdendritic Feeding in Lost Foam Casting 9,4; 386-395

alloy AZ 80
Corrosion Fatigue Behavior of the High-Strength Magnesium Alloy AZ 80 9,4; 402-407

alloy C-350
Banding of MAR-Aging Steel 9,2; 147-152

alloy IN738LC
Tensile Strengthening in the Nickel-Base Superalloy IN738LC 9,3; 324-329

aluminum
Determining the Effect of Microstructure and Heat Treatment on the Mechanical Strengthening Behavior of an Aluminum Alloy Containing Lithium Precipitation Hardened with the δ' Al_3Li Intermetallic Phase 9,4; 428-440

Microstructural and Mechanical Investigation of Aluminum Tailor-Welded Blanks 9,5; 541-551

Spheroidization of the Al-Si Eutectic in a Cast Aluminum Alloy 9,6; 616-622

Surface Engineering with Light Alloys—Hard Coatings, Thin Films, and Plasma Nitriding 9,3; 302-305

aluminum alloys
An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9,4; 441-448

Effect of Aging on Oxidation Behavior of Aluminum-Albite Composites at High Temperatures 9,3; 344-349

Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401

AISI 430
Use of Stainless Steels in Bus Coach Structures 9,6; 669-677

Al 5083 alloy
The Degradation of Corrosion Resistance for Al 5083 Alloy after Thermal and Superplastic Forming Processes 9,3; 253-260

Al and Al (Mn) alloys
Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358

Al-12.1% Zn
Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401

Al-Cu-Mg alloy
Effect of Delayed Aging on Mechanical Properties of an Al-Cu-Mg Alloy 9,1; 24-27

Al-Cu-Si alloys
Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221

Al-Li alloys
An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9,3; 266-271

Al-Si-Mg alloys
Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221

alloy 6061
Recrystallization Behavior of Rolled Ingots of 6061 and 6069 Aluminum Alloys 9,4; 416-423

alloy 6069
Recrystallization Behavior of Rolled Ingots of 6061 and 6069 Aluminum Alloys 9,4; 416-423

alloy 7075-T6
An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9,4; 441-448

alloy A356
A Study of Thermal Parameters and Interdendritic Feeding in Lost Foam Casting 9,4; 386-395

alloy AZ 80
Corrosion Fatigue Behavior of the High-Strength Magnesium Alloy AZ 80 9,4; 402-407

alloy C-350
Banding of MAR-Aging Steel 9,2; 147-152

alloy IN738LC
Tensile Strengthening in the Nickel-Base Superalloy IN738LC 9,3; 324-329

aluminum
Determining the Effect of Microstructure and Heat Treatment on the Mechanical Strengthening Behavior of an Aluminum Alloy Containing Lithium Precipitation Hardened with the δ' Al_3Li Intermetallic Phase 9,4; 428-440

Microstructural and Mechanical Investigation of Aluminum Tailor-Welded Blanks 9,5; 541-551

Spheroidization of the Al-Si Eutectic in a Cast Aluminum Alloy 9,6; 616-622

Surface Engineering with Light Alloys—Hard Coatings, Thin Films, and Plasma Nitriding 9,3; 302-305

aluminum alloys
An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9,4; 441-448

Effect of Aging on Oxidation Behavior of Aluminum-Albite Composites at High Temperatures 9,3; 344-349

Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401

Recrystallization Behavior of Rolled Ingots of 6061 and 6069 Aluminum Alloys 9,4; 416-423
The Jominy End Quench for Light-Weight Alloy Development 9,4; 408-415

aluminum alloy 6013-20 SiC(P)
Corrosion Resistance of a New AL 6013-20 SiC(P) in Salt Spray Chamber 9,3; 338-343

aluminum alloy 6061
Effect of Aging on Oxidation Behavior of Aluminum-Albite Composites at High Temperatures 9,3; 344-349

aluminum composite
Effect of Heat Treatment on Mechanical Properties of Particulate Reinforced Al6061 Composites 9,5; 557-561

aluminum sheet
On Predicting Forming Limits Using Hill's Yield Criteria 9,2; 174-182

aluminum-1S
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323

aluminum-killed steel
On Predicting Forming Limits Using Hill's Yield Criteria 9,2; 174-182

anelasticity
Anelastic Deformation Measurements in Structural Engineering Alloys 9,4; 463-466

arc spray
Mechanical and Thermomechanical Properties of Metal Spray Invar For Composite Forming Tooling 9,6; 630-637

artificial aging
Effect of Delayed Aging on Mechanical Properties of an Al-Cu-Mg Alloy 9,1; 24-27

atomized
Oxidation Behavior of Atomized Fe40Al Intermetallics Doped with Boron and Reinforced with Alumina Fibers 9,6; 638-642

austemper
Tensile Properties of Austempered Ductile Iron under Thermomechanical Treatment 9,1; 56-61

austempering
Effect of Austempering Time on Mechanical Properties of a Low Manganese Austempered Ductile Iron 9,2; 193-203

austenite stainless steel
Laser Surface Hardening of Austenitic Stainless Steel 9,5; 536-540

austenitic steels
Chemical Composition Optimization for Austenitic Steels of the Fe-Mn-Al-C System 9,6; 597-602
High-Temperature Corrosion Observed in Austenitic Coils and Tubes in a Direct Reduction Process 9,1; 88-94

autoclave
Mechanical and Thermomechanical Properties of Metal Spray Invar For Composite Forming Tooling 9,6; 630-637

automotive tests
The Effect of Thermal Barrier Coated Piston Crown on Engine Characteristics 9,1; 103-109

babbit bushes of steam turbine
Wear and Failure of Babbit Bushes in Steam Turbine Sliding Bearings 9,1; 110-115

banding
Banding of MAR-Aging Steel 9,2; 147-152

bandwidths
Banding of MAR-Aging Steel 9,2; 147-152

beta flecks
Effect of Beta Flecks on Low-Cycle Fatigue Properties of Ti-10V-2Fe-3Al 9,2; 222-227

borides
Laser Surface Hardening of Austenitic Stainless Steel 9,5; 536-540

brazing
Use of Metallic Glasses in Molybdenum Disilicide-Stainless Steel Joining 9,3; 280-285

carbides
Laser Surface Hardening of Austenitic Stainless Steel 9,5; 536-540

carbon nitride
Indentation and Scratch Tests on Sputtered Amorphous CN_X Films Deposited on Plasma-Nitrided Ti-6Al-4V 9,5; 499-505

cast and wrought
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214

cast low- and medium-carbon steels
Regression Analysis of the Mechanical Properties—Composition Dependencies for Cast Low- and Medium-Carbon Steels 9,4; 365-369

castings
Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221
Spheroidization of the Al-Si Eutectic in a Cast Aluminum Alloy 9,6; 616-622

cathodic
Corrosion Control of Steel-Reinforced Concrete 9,5; 585-588

cavitation
The Degradation of Corrosion Resistance for Al 5083 Alloy after Thermal and Superplastic Forming Processes 9,3; 253-260

cement
Corrosion Control of Steel-Reinforced Concrete 9,5; 585-588

ceramics
Experimental Investigation of the Dynamic Elastic Modulus and Vibration Damping in $MoSi_2$-30%Si_3N_4 as a Function of Temperature 9,1; 116-119

coal slurry
Erosion of a High-Carbon Steel in Coal and Bottom-Ash Slurries 9,5; 522-529

coarsening phenomena
Induction Heating of Semisolid Billet and Control of Globular Microstructure to Prevent Coarsening Phenomena 9,1; 12-23

coatings
Composite Coatings of Si_3N_4-Soda Lime Silica Produced by the Thermal Spray Process 9,6; 603-608

cohesion of babbit bushes
Wear and Failure of Babbit Bushes in Steam Turbine Sliding Bearings 9,1; 110-115

coiling
Hot Strip Processing of Low Carbon Enameling Grades in the Range of 600 to 700 °C 9,2; 131-137

coils
High-Temperature Corrosion Observed in Austenitic Coils and Tubes in a Direct Reduction Process 9,1; 88-94

cold drawing
Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279

compatibility
Corrosion Behavior and Tensile Properties of AISI 316LN Stainless Steel Exposed to Flowing Sodium at 823 K 9,1; 98-102

composites
Effect of Heat Treatment on Mechanical Properties of Particulate Reinforced Al6061 Composites 9.5: 557-561
Investigation on the Constitution and Mechanical Characteristic of Composite Containing Silicon-Carbide Produced by Electroless Co-deposition 9.4: 379-385
Mechanical and Thermomechanical Properties of Metal Spray Invar For Composite Forming Tooling 9.6: 630-637
composite materials
Materials for Electromagnetic Interference Shielding 9.3: 350-354
compound casting
The Effect of Continuous Cooling Heat Treatment on Interface Properties of SK3/Copper Compound Casting 9.1: 81-87
compression tests
Anelastic Deformation Measurements in Structural Engineering Alloys 9.4: 463-466
concrete
Corrosion Control of Steel-Reinforced Concrete 9.5: 585-588
continuous casting coatings
Hot Strip Processing of Low Carbon Enameling Grades in the Range of 600 to 700 °C 9.2: 131-137
continuous cooling
The Effect of Continuous Cooling Heat Treatment on Interface Properties of SK3/Copper Compound Casting 9.1: 81-87
control of globular microstructure
Induction Heating of Semisolid Billet and Control of Globular Microstructure to Prevent Coarsening Phenomena 9.1: 12-23
cooling rate
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9.2: 204-214
copper-based alloys
Tensile Properties of Some Copper- and Zinc-Based Alloys: Effects of Strain Rate and Test Temperature 9.6: 688-699
copper-chromium alloy
Control of Microstructures and Properties of a Phosphorus-Containing Cu-0.6 Wt.% Cr Alloy through Precipitation Treatment 9.6: 623-629
copper/steel cladding
The Effect of Continuous Cooling Heat Treatment on Interface Properties of SK3/Copper Compound Casting 9.1: 81-87
corrosion
An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9.4: 441-448
Corrosion Control of Steel-Reinforced Concrete 9.5: 585-588
Corrosion Reactivity of Laser-Peened Steel Surfaces 9.6: 656-662
Corrosion Resistance of a New AL 6013-20 SiC(P) in Salt Spray Chamber 9.3: 338-343
High-Temperature Corrosion Observed in Austenitic Coils and Tubes in a Direct Reduction Process 9.1: 88-94
Use of Stainless Steels in Bus Coach Structures 9.6: 669-677
crack initiation
Response of Ductile Metal Sheet Parameters to the Cone Angle of Indenting Conical Tool and Fracture Toughness Evaluation 9.5: 489-498
creep
Effect of Die-Casting Conditions on Viscoelastic Behavior of Mg Alloy 9.3: 297-301
crevice corrosion
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9.3: 317-323
Cu-Zn-Al alloy
Phase Transformation of a CuZnAl Alloy during Friction 9.3: 311-315
cyclic loads
Strain-Life Fatigue Predictions for Sintered Steels with Nonzero Mean Stress 9.6: 683-687
damping
Experimental Investigation of the Dynamic Elastic Modulus and Vibration Damping in $MoSi_2$-30%Si_3N_4 as a Function of Temperature 9.1: 116-119
dead heat
Banding of MAR-Aging Steel 9.2: 147-152
deformation
Deformation of Specimen During Laser Surface Remelting 9.2: 138-146
deformation heat treatment
Wear and Failure of Babbit Bushes in Steam Turbine Sliding Bearings 9.1: 110-115
delayed aging
Effect of Delayed Aging on Mechanical Properties of an Al-Cu-Mg Alloy 9.1: 24-27
density
An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9.3: 266-271
diamond coatings
Improvement of Erosion Resistance of Titanium with Different Surface Treatments 9.5: 571-579
die-casting parameters
Effect of Die-Casting Conditions on Viscoelastic Behavior of Mg Alloy 9.3: 297-301
diffusion
Kinetics of Plasma Nitriding and Renitriding of 3% Cr-Mo-V Steel 9.4: 457-462
diffusion bonding
Diffusion Bonding of a Superplastic Inconel 718SPF Superalloy by Electroless Nickel Plating 9.1: 51-55
direct reduction
High-Temperature Corrosion Observed in Austenitic Coils and Tubes in a Direct Reduction Process 9.1: 88-94
Doppler broadening
Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9.3: 355-358
dual-phase steel
Effect of Microvoid Formation on the Tensile Properties of Dual-Phase Steel 9.3: 306-310
ductile iron
Effect of Austempering Time on Mechanical Properties of a Low Manganese Austempered Ductile Iron 9.2: 193-203
Tensile Properties of Austempered Ductile Iron under Thermomechanical Treatment 9.1: 56-61
ductile metal sheet
Response of Ductile Metal Sheet Parameters to the Cone Angle of Indenting Conical Tool and Fracture Toughness Evaluation 9.5: 489-498
ductility
Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9.2: 215-221

duplex treatment
Indentation and Scratch Tests on Sputtered Amorphous CN_X Films Deposited on Plasma-Nitrided Ti-6Al-4V 9,5; 499-505
dynamic fracture toughness
Failure Modes and Materials Performance of Railway Wheels 9,5; 580-584
easy-glide stage
On the Initial Stage of Plastic Deformation of Metal Alloys 9,2; 170-173
elastic modulus
An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9,3; 266-271
electrical resistance
Interface in Mechanically Fastened Steel Joint, Studied by Contact Electrical Resistance Measurement 9,1; 95-97
electrochemical potential
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323
electrochemical tests
Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401
electroless co-deposition
Investigation on the Constitution and Mechanical Characteristic of Composite Containing Silicon-Carbide Produced by Electroless Co-deposition 9,4; 379-385
electroless nickel plating
Diffusion Bonding of a Superplastic Inconel 718SPF Superalloy by Electroless Nickel Plating 9,1; 51-55
electromagnetic interference shielding
Materials for Electromagnetic Interference Shielding 9,3; 350-354
electron microscopy
Control of Microstructures and Properties of a Phosphorus-Containing Cu-0.6 Wt.% Cr Alloy through Precipitation Treatment 9,6; 623-629
EMI gaskets
Materials for Electromagnetic Interference Shielding 9,3; 350-354
EMI shielding
Flexible Graphite for Gasketing, Adsorption, Electromagnetic Interference Shielding, Vibration Damping, Electrochemical Applications, and Stress Sensing 9,2; 161-163
Materials for Electromagnetic Interference Shielding 9,3; 350-354
enameling
Hot Strip Processing of Low Carbon Enameling Grades in the Range of 600 to 700 °C 9,2; 131-137
environmental effects
Effect of Aging on Oxidation Behavior of Aluminum-Albite Composites at High Temperatures 9,3; 344-349
Environmental Effect on Mechanical Properties of Aluminide Matrix Composites 9,6; 678-682
equiaxed microstructure
A Study on a Thixoforming Process Using the Thixotropic Behavior of an Aluminum Alloy with an Equiaxed Microstructure 9,5; 530-535
equilibration time
Estimating Equilibration Times and Heating/Cooling Rates in Heat Treatment of Workpieces with Arbitrary Geometry 9,1; 62-71
erosion
Erosion of a High-Carbon Steel in Coal and Bottom-Ash Slurries 9,5; 522-529
erosion/wear
Improvement of Erosion Resistance of Titanium with Different Surface Treatments 9,5; 571-579
experimental verification
The Determination of Initial Blank Shape by Using the One-step Finite Element Method and Experimental Verification 9,2; 183-192
failure analysis
Failure Modes and Materials Performance of Railway Wheels 9,5; 580-584
Microstructural Features of Prematurely Failed Hot-Strip Mill Work Rolls: Some Studies in Spalling Propensity 9,4; 449-456
failure of babbit
Wear and Failure of Babbit Bushes in Steam Turbine Sliding Bearings 9,1; 110-115
fastening
Interface in Mechanically Fastened Steel Joint, Studied by Contact Electrical Resistance Measurement 9,1; 95-97
fatigue
An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9,4; 441-448
Behavior of Fe-Mn-Al-C Steels during Cyclic Tests 9,3; 334-337
Corrosion Fatigue Behavior of the High-Strength Magnesium Alloy AZ 80 9,4; 402-407
Strain-Life Fatigue Predictions for Sintered Steels with Nonzero Mean Stress 9,6; 683-687
fatigue life prediction
Strain-Life Fatigue Predictions for Sintered Steels with Nonzero Mean Stress 9,6; 683-687
fatigue property
Failure Modes and Materials Performance of Railway Wheels 9,5; 580-584
FeMnAlC alloys
Chemical Composition Optimization for Austenitic Steels of the Fe-Mn-Al-C System 9,6; 597-602
Fe-Mn-Al-C steels
Behavior of Fe-Mn-Al-C Steels during Cyclic Tests 9,3; 334-337
filler metal
Effect of Mechanical Properties Using Different Filler Metals on Wide-Clearance Activated-Diffusion-Brazed Ni-Based Superalloy 9,6; 663-668
final holding time
Induction Heating of Semisolid Billet and Control of Globular Microstructure to Prevent Coarsening Phenomena 9,1; 12-23
finite element analysis
Effect of Geometry on the Performance of Model Metal Matrix Composite Joints and Transitions 9,6; 643-648
finite element method
The Determination of Initial Blank Shape by Using the One-step Finite Element Method and Experimental Verification 9,2; 183-192
finite element method prediction
Study of Workability Limits of Porous Materials under Different Upsetting Conditions by Compressible Rigid Plastic Finite Element Method 9,2; 164-169
forming limits
On Predicting Forming Limits Using Hill's Yield Criteria 9,2; 174-182

fracture
Environmental Effect on Mechanical Properties of Aluminide Matrix Composites 9,6; 678-682
fracture mechanics
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214
fracture toughness
Response of Ductile Metal Sheet Parameters to the Cone Angle of Indenting Conical Tool and Fracture Toughness Evaluation 9,5; 489-498
friction
Phase Transformation of a CuZnAl Alloy during Friction 9,3; 311-315
friction reducing
Structure and Friction-Reducing Property of the Sulfide Layer Produced by Ion Sulfuration 9,2; 228-233
galvanic corrosion
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323
globular microstructure
A Study on a Thixoforming Process Using the Thixotropic Behavior of an Aluminum Alloy with an Equiaxed Microstructure 9,5; 530-535
grain size
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214
Effect of Prior β-Grain Size on the Hot Deformation Behavior of Ti-6Al-4V: Coarse vs Coarser 9,2; 153-160
Effect of Zirconium on the Magnetic Properties of Nonoriented Semiprocessed Electrical Steel Sheet 9,5; 552-556
graphite
Flexible Graphite for Gasketing, Adsorption, Electromagnetic Interference Shielding, Vibration Damping, Electrochemical Applications, and Stress Sensing 9,2; 161-163
hard coating
Optimum Me-DLC Coatings and Hard Coatings for Tribological Performance 9,1; 38-50
Surface Engineering with Light Alloys—Hard Coatings, Thin Films, and Plasma Nitriding 9,3; 302-305
hardfacing materials
Effect of Microstructure and Chemical Composition of Hardfacing Alloy on Abrasive Wear Behavior 9,6; 649-655
hardness
Control of Microstructures and Properties of a Phosphorus-Containing Cu-0.6 Wt.% Cr Alloy through Precipitation Treatment 623-629
Microstructural Features of Prematurely Failed Hot-Strip Mill Work Rolls: Some Studies in Spalling Propensity 9,4; 449-456
heat conduction
Estimating Equilibration Times and Heating/Cooling Rates in Heat Treatment of Workpieces with Arbitrary Geometry 9,1; 62-71
heat deposition
A Multiscale Homogenization Procedure for Analysis of Processes Involving Heat Deposition Using Constrained Parameter Optimization 9,5; 562-570
heat treating
Spheroidization of the Al-Si Eutectic in a Cast Aluminum Alloy 9,6; 616-622
A Study of Thermal Parameters and Interdendritic Feeding in Lost Foam Casting 9,4; 386-395
heat treatment
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214
An Optimal Heat Treatment Cycle for a 26Cr, 2Mo Stainless Steel 9,3; 261-265
Control of Microstructures and Properties of a Phosphorus-Containing Cu-0.6 Wt.% Cr Alloy through Precipitation Treatment 9,6; 623-629
Effect of Heat Treatment on Mechanical Properties of Particulate Reinforced Al6061 Composites 9,5; 557-561
Estimating Equilibration Times and Heating/Cooling Rates in Heat Treatment of Workpieces with Arbitrary Geometry 9,1; 62-71
Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221
Tensile Properties of Austempered Ductile Iron under Thermomechanical Treatment 9,1; 56-61
The Jominy End Quench for Light-Weight Alloy Development 9,4; 408-415
heat-affected zone
Carbide and Hardness Development in the Heat-Affected Zone of Tempered and Postweld Heat-Treated 2.25Cr-1Mo Steel Weldments 9,5; 477-488
heating rate
Estimating Equilibration Times and Heating/Cooling Rates in Heat Treatment of Workpieces with Arbitrary Geometry 9,1; 62-71
high temperature
High-Temperature Corrosion Observed in Austenitic Coils and Tubes in a Direct Reduction Process 9,1; 88-94
hot processing
Effect of Prior β-Grain Size on the Hot Deformation Behavior of Ti-6Al-4V: Coarse vs Coarser 9,2; 153-160
hot-strip mill
Microstructural Features of Prematurely Failed Hot-Strip Mill Work Rolls: Some Studies in Spalling Propensity 9,4; 449-456
HVOF
Mechanical and Thermomechanical Properties of Metal Spray Invar For Composite Forming Tooling 9,6; 630-637
HVOF spraying
Effect of Microstructure and Chemical Composition of Hardfacing Alloy on Abrasive Wear Behavior 9,6; 649-655
hydrogen-assisted cracking
Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279
hypereutectic steels
A Review of Microsegregation Induced Banding Phenomena in Steels 9,3; 286-296
hypereutectoid steels
A Review of Microsegregation Induced Banding Phenomena in Steels 9,3; 286-296
hysteresis
Application of Shape Memory Alloy Wire Actuator for Precision Position Control of a Composite Beam 9,3; 330-333
Inconel 718SPF superalloy
Diffusion Bonding of a Superplastic Inconel 718SPF Superalloy by Electroless Nickel Plating 9,1; 51-55
indentation
Indentation and Scratch Tests on Sputtered Amorphous CN_X Films Deposited on Plasma-Nitrided Ti-6Al-4V 9,5; 499-505

indium tin oxide
Reactive Magnetron Sputtering of Indium Tin Oxide Films on Acrylics—Electrical Resistivity and Optical Properties 9,4; 424-427
induction heating
Induction Heating of Semisolid Billet and Control of Globular Microstructure to Prevent Coarsening Phenomena 9,1; 12-23
initial blank shape
The Determination of Initial Blank Shape by Using the One-step Finite Element Method and Experimental Verification 9,2; 183-192
intercritical heat treatment
Effect of Microvoid Formation on the Tensile Properties of Dual-Phase Steel 9,3; 306-310
interdendritic feeding
A Study of Thermal Parameters and Interdendritic Feeding in Lost Foam Casting 9,4; 386-395
interface
Effect of Geometry on the Performance of Model Metal Matrix Composite Joints and Transitions 9,6; 643-648
Interface in Mechanically Fastened Steel Joint, Studied by Contact Electrical Resistance Measurement 9,1; 95-97
intergranular corrosion
The Degradation of Corrosion Resistance for Al 5083 Alloy after Thermal and Superplastic Forming Processes 9,3; 253-260
intergranular cracking
Effect of Beta Flecks on Low-Cycle Fatigue Properties of Ti-10V-2Fe-3Al 9,2; 222-227
intermetallic compounds
Environmental Effect on Mechanical Properties of Aluminide Matrix Composites 9,6; 678-682
intermetallics
Laser Processing of Titanium Aluminides 9,5; 506-515
Invar
Mechanical and Thermomechanical Properties of Metal Spray Invar For Composite Forming Tooling 9,6; 630-637
iron aluminides
Oxidation Behavior of Atomized Fe40Al Intermetallics Doped with Boron and Reinforced with Alumina Fibers 9,6; 638-642
isothermal solidification
Effect of Mechanical Properties Using Different Filler Metals on Wide-Clearance Activated-Diffusion-Brazed Ni-Based Superalloy 9,6; 663-668
joining
Effect of Geometry on the Performance of Model Metal Matrix Composite Joints and Transitions 9,6; 643-648
joint steel
Interface in Mechanically Fastened Steel Joint, Studied by Contact Electrical Resistance Measurement 9,1; 95-97
Jominy
The Jominy End Quench for Light-Weight Alloy Development 9,4; 408-415
knowledge base
Research on the Neural Networks Used for Shaping Tubes by the Liquid Extrusion Process 9,1; 28-32
laser
Corrosion Reactivity of Laser-Peened Steel Surfaces 9,6; 656-662
laser cladding
Electron Microscopy Structure Study of Laser-Clad TiC-Ni Particle-Reinforced Coating 9,2; 234-246
laser hardening
Laser Surface Hardening of Austenitic Stainless Steel 9,5; 536-540
laser processing
Laser Processing of Titanium Aluminides 9,5; 506-515
laser remelting
Laser Remelting of Plasma-Sprayed Yttria Partially Stabilized Zirconia Coatings 9,5; 516-521
laser shock peening
Effect of Power Density and Pulse Repetition on Laser Shock Peening of Ti-6Al-4V 9,1; 33-37
laser surface remelting
Deformation of Specimen During Laser Surface Remelting 9,2; 138-146
liquid extrusion
Research on the Neural Networks Used for Shaping Tubes by the Liquid Extrusion Process 9,1; 28-32
localization of strain
On the Initial Stage of Plastic Deformation of Metal Alloys 9,2; 170-173
localized anodic dissolution
Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279
lost foam casting
A Study of Thermal Parameters and Interdendritic Feeding in Lost Foam Casting 9,4; 386-395
low heat rejection
The Effect of Thermal Barrier Coated Piston Crown on Engine Characteristics 9,1; 103-109
low-cycle fatigue
Effect of Beta Flecks on Low-Cycle Fatigue Properties of Ti-10V-2Fe-3Al 9,2; 222-227
low-temperature ion sulfuration
Structure and Friction-Reducing Property of the Sulfide Layer Produced by Ion Sulfuration 9,2; 228-233
LSP
Effect of Power Density and Pulse Repetition on Laser Shock Peening of Ti-6Al-4V 9,1; 33-37
magnesium
Corrosion Fatigue Behavior of the High-Strength Magnesium Alloy AZ 80 9,4; 402-407
magnesium alloys
Effect of Die-Casting Conditions on Viscoelastic Behavior of Mg Alloy 9,3; 297-301
magnetic properties
Effect of Zirconium on the Magnetic Properties of Nonoriented Semiprocessed Electrical Steel Sheet 9,5; 552-556
manufacture-induced anisotropy
Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279
mechanical
Investigation on the Constitution and Mechanical Characteristic of Composite Containing Silicon-Carbide Produced by Electroless Co-deposition 9,4; 379-385
mechanical alloying
Characterization and Sinterability of Oxide-Dispersion Strengthened Nickel Powder Produced by Mechanical Alloying 9,4; 370-378
mechanical properties
Chemical Composition Optimization for Austenitic Steels of the Fe-Mn-Al-C System 9,6; 597-602
Effect of Delayed Aging on Mechanical Properties of an Al-Cu-Mg Alloy 9,1; 24-27

Influence of Nonmetallic Inclusion Characteristics on the Mechanical Properties of Rail Steel 9,6; 700-709
Laser Remelting of Plasma-Sprayed Yttria Partially Stabilized Zirconia Coatings 9,5; 516-521
Microstructural and Mechanical Investigation of Aluminum Tailor-Welded Blanks 9,5; 541-551
Regression Analysis of the Mechanical Properties—Composition Dependencies for Cast Low- and Medium-Carbon Steels 9,4; 365-369
Tensile Strengthening in the Nickel-Base Superalloy IN738LC 9,3; 324-329
Toughness and Microstructure of 13Cr4NiMo High-Strength Steel Welds 9,6; 609-615

Me-DLC

Optimum Me-DLC Coatings and Hard Coatings for Tribological Performance 9,1; 38-50

metal matrix composites

Corrosion Resistance of a New AL 6013-20 SiC(P) in Salt Spray Chamber 9,3; 338-343
Effect of Aging on Oxidation Behavior of Aluminum-Albite Composites at High Temperatures 9,3; 344-349

metallic glasses

Use of Metallic Glasses in Molybdenum Disilicide-Stainless Steel Joining 9,3; 280-285

metal spray

Mechanical and Thermomechanical Properties of Metal Spray Invar For Composite Forming Tooling 9,6; 630-637

Mg-Al-Zn alloys

Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221

microhardness

Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358
Kinetics of Plasma Nitriding and Renitriding of 3% Cr-Mo-V Steel 9,4; 457-462

microporosity

A Study of Thermal Parameters and Interdendritic Feeding in Lost Foam Casting 9,4; 386-395

microscopy

Laser Processing of Titanium Aluminides 9,5; 506-515
Microstructural and Mechanical Investigation of Aluminum Tailor-Welded Blanks 9,5; 541-551

microsegregation

Banding of MAR-Aging Steel 9,2; 147-152

microsegregation (banding)

A Review of Microsegregation Induced Banding Phenomena in Steels 9,3; 286-296

microstructure

Toughness and Microstructure of 13Cr4NiMo High-Strength Steel Welds 9,6; 609-615

microstructural orientation

Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279

microstructure

Carbide and Hardness Development in the Heat-Affected Zone of Tempered and Postweld Heat-Treated 2.25Cr-1Mo Steel Weldments 9,5; 477-488
Determining the Effect of Microstructure and Heat Treatment on the Mechanical Strengthening Behavior of an Aluminum Alloy Containing Lithium Precipitation Hardened with the δ' Al_3Li Intermetallic Phase 9,4; 428-440
Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401
Electron Microscopy Structure Study of Laser-Clad TiC-Ni Particle-Reinforced Coating 9,2; 234-246
Laser Remelting of Plasma-Sprayed Yttria Partially Stabilized Zirconia Coatings 9,5; 516-521

microstructure-property correlation

Tensile Properties of Some Copper- and Zinc-Based Alloys: Effects of Strain Rate and Test Temperature 9,6; 688-699

microstructure spalling

Microstructural Features of Prematurely Failed Hot-Strip Mill Work Rolls: Some Studies in Spalling Propensity 9,4; 449-456

microvoids

Effect of Microvoid Formation on the Tensile Properties of Dual-Phase Steel 9,3; 306-310

MMC

Effect of Geometry on the Performance of Model Metal Matrix Composite Joints and Transitions 9,6; 643-648

molten sodium

Corrosion Behavior and Tensile Properties of AISI 316LN Stainless Steel Exposed to Flowing Sodium at 823 K 9,1; 98-102

molybdenum disilicide

Experimental Investigation of the Dynamic Elastic Modulus and Vibration Damping in $MoSi_2$-30%Si_3N_4 as a Function of Temperature 9,1; 116-119
Use of Metallic Glasses in Molybdenum Disilicide-Stainless Steel Joining 9,3; 280-285

multiscale homogenization

A Multiscale Homogenization Procedure for Analysis of Processes Involving Heat Deposition Using Constrained Parameter Optimization 9,5; 562-570

NaCl salt spray test

Corrosion Resistance of a New AL 6013-20 SiC(P) in Salt Spray Chamber 9,3; 338-343

neural network

Research on the Neural Networks Used for Shaping Tubes by the Liquid Extrusion Process 9,1; 28-32

Ni_3Al

Environmental Effect on Mechanical Properties of Aluminide Matrix Composites 9,6; 678-682

Ni-Mo rations

Banding of MAR-Aging Steel 9,2; 147-152

Ni-Ti alloys

Application of Shape Memory Alloy Wire Actuator for Precision Position Control of a Composite Beam 9,3; 330-333

Nitinol

Application of Shape Memory Alloy Wire Actuator for Precision Position Control of a Composite Beam 9,3; 330-333

nitrides

Laser Surface Hardening of Austenitic Stainless Steel 9,5; 536-540

nitriding

Kinetics of Plasma Nitriding and Renitriding of 3% Cr-Mo-V Steel 9,4; 457-462

nodular iron

Deformation of Specimen During Laser Surface Remelting 9,2; 138-146

nonmetallic inclusions

Influence of Nonmetallic Inclusion Characteristics on the Mechanical Properties of Rail Steel 9,6; 700-709

one-step approach
The Determination of Initial Blank Shape by Using the One-step Finite Element Method and Experimental Verification 9,2; 183-192

optical properties
Reactive Magnetron Sputtering of Indium Tin Oxide Films on Acrylics—Electrical Resistivity and Optical Properties 9,4; 424-427

optimal inductive coil
Induction Heating of Semisolid Billet and Control of Globular Microstructure to Prevent Coarsening Phenomena 9,1; 12-23

oxidation
Effect of Aging on Oxidation Behavior of Aluminum-Albite Composites at High Temperatures 9,3; 344-349
Oxidation Behavior of Atomized Fe40Al Intermetallics Doped with Boron and Reinforced with Alumina Fibers 9,6; 638-642

oxide-dispersion strengthened Ni
Characterization and Sinterability of Oxide-Dispersion Strengthened Nickel Powder Produced by Mechanical Alloying 9,4; 370-378

parameter development
Composite Coatings of Si_3N_4-Soda Lime Silica Produced by the Thermal Spray Process 9,6; 603-608

parameter optimization
A Multiscale Homogenization Procedure for Analysis of Processes Involving Heat Deposition Using Constrained Parameter Optimization 9,5; 562-570

partially stabilized ZrO_2
The Effect of Thermal Barrier Coated Piston Crown on Engine Characteristics 9,1; 103-109

pearlitic steel
Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279

pearlitic structure
Influence of Nonmetallic Inclusion Characteristics on the Mechanical Properties of Rail Steel 9,6; 700-709

performance evaluation
Failure Modes and Materials Performance of Railway Wheels 9,5; 580-584

phase transformations
Phase Transformation of a CuZnAl Alloy during Friction 9,3; 311-315

pitting corrosion
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323

plasma nitriding
Improvement of Erosion Resistance of Titanium with Different Surface Treatments 9,5; 571-579
Surface Engineering with Light Alloys—Hard Coatings, Thin Films, and Plasma Nitriding 9,3; 302-305

plasma spraying
Wear and Failure of Babbit Bushes in Steam Turbine Sliding Bearings 9,1; 110-115

plasma-sprayed yttria partially stabilized zirconia coatings
Laser Remelting of Plasma-Sprayed Yttria Partially Stabilized Zirconia Coatings 9,5; 516-521

plastic deformation
On the Initial Stage of Plastic Deformation of Metal Alloys 9,2; 170-173
On Predicting Forming Limits Using Hill's Yield Criteria 9,2; 174-182

porosity
Effect of Die-Casting Conditions on Viscoelastic Behavior of Mg Alloy 9,3; 297-301

porous materials
Study of Workability Limits of Porous Materials under Different Upsetting Conditions by Compressible Rigid Plastic Finite Element Method 9,2; 164-169

positron annihilation
Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358

post treatment
On Reducing the Post-Heat-Treatment Time of the Weldment 9,1; 72-80

postweld heat treatment
Carbide and Hardness Development in the Heat-Affected Zone of Tempered and Postweld Heat-Treated 2.25Cr-1Mo Steel Weldments 9,5; 477-488
Toughness and Microstructure of 13Cr4NiMo High-Strength Steel Welds 9,6; 609-615

powder metallurgy
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214

precipitation hardening
Control of Microstructures and Properties of a Phosphorus-Containing Cu-0.6 Wt.% Cr Alloy through Precipitation Treatment 9,6; 623-629
Determining the Effect of Microstructure and Heat Treatment on the Mechanical Strengthening Behavior of an Aluminum Alloy Containing Lithium Precipitation Hardened with the δ' Al_3Li Intermetallic Phase 9,4; 428-440

preheat
Effect of Preheat on Residual Stress Distributions in Arc-Welded Mild Steel Plates 9,1; 7-11

process parameter
The Determination of Initial Blank Shape by Using the One-step Finite Element Method and Experimental Verification 9,2; 183-192

processing science
Composite Coatings of Si_3N_4-Soda Lime Silica Produced by the Thermal Spray Process 9,6; 603-608

push-out tests
Use of Metallic Glasses in Molybdenum Disilicide-Stainless Steel Joining 9,3; 280-285

quench cracking
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214

quenching
The Jominy End Quench for Light-Weight Alloy Development 9,4; 408-415

railway steel
Influence of Nonmetallic Inclusion Characteristics on the Mechanical Properties of Rail Steel 9,6; 700-709

reactive hot pressing
Environmental Effect on Mechanical Properties of Aluminide Matrix Composites 9,6; 678-682

reactive sputtering
Reactive Magnetron Sputtering of Indium Tin Oxide Films on Acrylics—Electrical Resistivity and Optical Properties 9,4; 424-427

recovery
Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358

recrystallization
Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358

Recrystallization Behavior of Rolled Ingots of 6061 and 6069 Aluminum Alloys 9,4; 416-423

relative density
Study of Workability Limits of Porous Materials under Different Upsetting Conditions by Compressible Rigid Plastic Finite Element Method 9,2; 164-169

residual stress
Effect of Power Density and Pulse Repetition on Laser Shock Peening of Ti-6Al-4V 9,1; 33-37

Effect of Preheat on Residual Stress Distributions in Arc-Welded Mild Steel Plates 9,1; 7-11

On Reducing the Post-Heat-Treatment Time of the Weldment 9,1; 72-80

residual stresses
Corrosion Reactivity of Laser-Peened Steel Surfaces 9,6; 656-662

Deformation of Specimen During Laser Surface Remelting 9,2; 138-146

resistivity
Reactive Magnetron Sputtering of Indium Tin Oxide Films on Acrylics—Electrical Resistivity and Optical Properties 9,4; 424-427

retained austenite
Toughness and Microstructure of 13Cr4NiMo High-Strength Steel Welds 9,6; 609-615

rolling
Recrystallization Behavior of Rolled Ingots of 6061 and 6069 Aluminum Alloys 9,4; 416-423

salt spray corrosion
Corrosion Fatigue Behavior of the High-Strength Magnesium Alloy AZ 80 9,4; 402-407

scratch test
Indentation and Scratch Tests on Sputtered Amorphous CN_X Films Deposited on Plasma-Nitrided Ti-6Al-4V 9,5; 499-505

self-excited waves of deformation
On the Initial Stage of Plastic Deformation of Metal Alloys 9,2; 170-173

semiprocessed nonoriented electrical steel
Effect of Zirconium on the Magnetic Properties of Nonoriented Semiprocessed Electrical Steel Sheet 9,5; 552-556

sensitization
The Degradation of Corrosion Resistance for Al 5083 Alloy after Thermal and Superplastic Forming Processes 9,3; 253-260

serial sections
Banding of MAR-Aging Steel 9,2; 147-152

shape memory alloys
Application of Shape Memory Alloy Wire Actuator for Precision Position Control of a Composite Beam 9,3; 330-333

sheet metal forming
The Determination of Initial Blank Shape by Using the One-step Finite Element Method and Experimental Verification 9,2; 183-192

shock waves
Corrosion Reactivity of Laser-Peened Steel Surfaces 9,6; 656-662

silicon carbide
Investigation on the Constitution and Mechanical Characteristic of Composite Containing Silicon-Carbide Produced by Electroless Co-deposition 9,4; 379-385

silicon nitride
Composite Coatings of Si_3N_4-Soda Lime Silica Produced by the Thermal Spray Process 9,6; 603-608

Experimental Investigation of the Dynamic Elastic Modulus and Vibration Damping in $MoSi_2$-30%Si_3N_4 as a Function of Temperature 9,1; 116-119

sintered materials
Strain-Life Fatigue Predictions for Sintered Steels with Nonzero Mean Stress 9,6; 683-687

soda glass
Composite Coatings of Si_3N_4-Soda Lime Silica Produced by the Thermal Spray Process 9,6; 603-608

soft martensitic stainless steel
Toughness and Microstructure of 13Cr4NiMo High-Strength Steel Welds 9,6; 609-615

solid oxide fuel cell (SOFC) anode
Characterization and Sinterability of Oxide-Dispersion Strengthened Nickel Powder Produced by Mechanical Alloying 9,4; 370-378

solubilization
Spheroidization of the Al-Si Eutectic in a Cast Aluminum Alloy 9,6; 616-622

solutionizing
Effect of Delayed Aging on Mechanical Properties of an Al-Cu-Mg Alloy 9,1; 24-27

spatial arrays
Banding of MAR-Aging Steel 9,2; 147-152

specific elastic modulus
An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9,3; 266-271

speckle interferometry
On the Initial Stage of Plastic Deformation of Metal Alloys 9,2; 170-173

spent fuel storage
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323

spheroidization
Spheroidization of the Al-Si Eutectic in a Cast Aluminum Alloy 9,6; 616-622

stainless steel
An Optimal Heat Treatment Cycle for a 26Cr, 2Mo Stainless Steel 9,3; 261-265

Corrosion Behavior and Tensile Properties of AISI 316LN Stainless Steel Exposed to Flowing Sodium at 823 K 9,1; 98-102

stamping
Microstructural and Mechanical Investigation of Aluminum Tailor-Welded Blanks 9,5; 541-551

static mechanical property
Failure Modes and Materials Performance of Railway Wheels 9,5; 580-584

steels
Corrosion Behavior and Tensile Properties of AISI 316LN Stainless Steel Exposed to Flowing Sodium at 823 K 9,1; 98-102

Corrosion Control of Steel-Reinforced Concrete 9,5; 585-588
Corrosion Reactivity of Laser-Peened Steel Surfaces 9,6; 656-662
Effect of Preheat on Residual Stress Distributions in Arc-Welded Mild Steel Plates 9,1; 7-11
Erosion of a High-Carbon Steel in Coal and Bottom-Ash Slurries 9,5; 522-529
Hot Strip Processing of Low Carbon Enameling Grades in the Range of 600 to 700 °C 9,2; 131-137

strain gauges

Effect of Preheat on Residual Stress Distributions in Arc-Welded Mild Steel Plates 9,1; 7-11

strain life

Strain-Life Fatigue Predictions for Sintered Steels with Nonzero Mean Stress 9,6; 683-687

strain rate

Tensile Properties of Some Copper- and Zinc-Based Alloys: Effects of Strain Rate and Test Temperature 9,6; 688-699

strength

Microstructure Design and Heat Treatment Selection for Casting Alloys Using the Quality Index 9,2; 215-221

stress corrosion

Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401

stress corrosion cracking

Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323

stress relaxation

Effect of Die-Casting Conditions on Viscoelastic Behavior of Mg Alloy 9,3; 297-301

structure

Structure and Friction-Reducing Property of the Sulfide Layer Produced by Ion Sulfuration 9,2; 228-233

sulfide layer

Structure and Friction-Reducing Property of the Sulfide Layer Produced by Ion Sulfuration 9,2; 228-233

superalloy

An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214

superplastic forming

The Degradation of Corrosion Resistance for Al 5083 Alloy after Thermal and Superplastic Forming Processes 9,3; 253-260

surface engineering

Effect of Microstructure and Chemical Composition of Hardfacing Alloy on Abrasive Wear Behavior 9,6; 649-655
Effect of Power Density and Pulse Repetition on Laser Shock Peening of Ti-6Al-4V 9,1; 33-37
Erosion of a High-Carbon Steel in Coal and Bottom-Ash Slurries 9,5; 522-529
Kinetics of Plasma Nitriding and Renitriding of 3% Cr-Mo-V Steel 9,4; 457-462

surface modification

Improvement of Erosion Resistance of Titanium with Different Surface Treatments 9,5; 571-579
Laser Surface Hardening of Austenitic Stainless Steel 9,5; 536-540

surface treatment

Corrosion Fatigue Behavior of the High-Strength Magnesium Alloy AZ 80 9,4; 402-407

***S-W* map**

Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358

temperature histories

A Multiscale Homogenization Procedure for Analysis of Processes Involving Heat Deposition Using Constrained Parameter Optimization 9,5; 562-570

tensile properties

Tensile Properties of Some Copper- and Zinc-Based Alloys: Effects of Strain Rate and Test Temperature 9,6; 688-699

tensile strength

An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9,4; 441-448
Corrosion Behavior and Tensile Properties of AISI 316LN Stainless Steel Exposed to Flowing Sodium at 823 K 9,1; 98-102

tensile stress

Tensile Strengthening in the Nickel-Base Superalloy IN738LC 9,3; 324-329

test temperature

Tensile Properties of Some Copper- and Zinc-Based Alloys: Effects of Strain Rate and Test Temperature 9,6; 688-699

Effect of Prior β-Grain Size on the Hot Deformation Behavior of Ti-6Al-4V: Coarse vs Coarser 9,2; 153-160
TiC-Ni particle
Electron Microscopy Structure Study of Laser-Clad TiC-Ni Particle-Reinforced Coating 9,2; 234-246
titanium
Effect of Prior β-Grain Size on the Hot Deformation Behavior of Ti-6Al-4V: Coarse vs Coarser 9,2; 153-160
Improvement of Erosion Resistance of Titanium with Different Surface Treatments 9,5; 571-579
Surface Engineering with Light Alloys—Hard Coatings, Thin Films, and Plasma Nitriding 9,3; 302-305
titanium alloys
Laser Processing of Titanium Aluminides 9,5; 506-515
tooling
Mechanical and Thermomechanical Properties of Metal Spray Invar For Composite Forming Tooling 9,6; 630-637
transient liquid phase sintering
Effect of Mechanical Properties Using Different Filler Metals on Wide-Clearance Activated-Diffusion-Brazed Ni-Based Superalloy 9,6; 663-668
transition
Effect of Geometry on the Performance of Model Metal Matrix Composite Joints and Transitions 9,6; 643-648
tribology
Effect of Microstructure and Chemical Composition of Hardfacing Alloy on Abrasive Wear Behavior 9,6; 649-655
Optimum Me-DLC Coatings and Hard Coatings for Tribological Performance 9,1; 38-50
Phase Transformation of a CuZnAl Alloy during Friction 9,3; 311-315
type 304 stainless steel
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323
type 304 steel
Anelastic Deformation Measurements in Structural Engineering Alloys 9,4; 463-466
type 4340 steel
Anelastic Deformation Measurements in Structural Engineering Alloys 9,4; 463-466
Udimet 720
An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214
vacuum casting
An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9,3; 266-271
vibration damping
Flexible Graphite for Gasketing, Adsorption, Electromagnetic Interference Shielding, Vibration Damping, Electrochemical Applications, and Stress Sensing 9,2; 161-163
wear
Effect of Microstructure and Chemical Composition of Hardfacing Alloy on Abrasive Wear Behavior 9,6; 649-655
Erosion of a High-Carbon Steel in Coal and Bottom-Ash Slurries 9,5; 522-529
Indentation and Scratch Tests on Sputtered Amorphous CN_X Films Deposited on Plasma-Nitrided Ti-6Al-4V 9,5; 499-505
wear tests
Wear and Failure of Babbit Bushes in Steam Turbine Sliding Bearings 9,1; 110-115
weld analysis
A Multiscale Homogenization Procedure for Analysis of Processes Involving Heat Deposition Using Constrained Parameter Optimization 9,5; 562-570
welding
Carbide and Hardness Development in the Heat-Affected Zone of Tempered and Postweld Heat-Treated 2.25Cr-1Mo Steel Weldments 9,5; 477-488
Effect of Preheat on Residual Stress Distributions in Arc-Welded Mild Steel Plates 9,1; 7-11
Microstructural and Mechanical Investigation of Aluminum Tailor-Welded Blanks 9,5; 541-551
On Reducing the Post-Heat-Treatment Time of the Weldment 9,1; 72-80
Use of Stainless Steels in Bus Coach Structures 9,6; 669-677
wet storage
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323
wheel steel
Failure Modes and Materials Performance of Railway Wheels 9,5; 580-584
workability limit
Study of Workability Limits of Porous Materials under Different Upsetting Conditions by Compressible Rigid Plastic Finite Element Method 9,2; 164-169
yield stress
Tensile Strengthening in the Nickel-Base Superalloy IN738LC 9,3; 324-329
yield-point plateau
On the Initial Stage of Plastic Deformation of Metal Alloys 9,2; 170-173
Young's modulus
Experimental Investigation of the Dynamic Elastic Modulus and Vibration Damping in $MoSi_2$-30%Si_3N_4 as a Function of Temperature 9,1; 116-119
yttria-stabilized ZrO_2
Characterization and Sinterability of Oxide-Dispersion Strengthened Nickel Powder Produced by Mechanical Alloying 9,4; 370-378
zinc-based alloys
Tensile Properties of Some Copper- and Zinc-Based Alloys: Effects of Strain Rate and Test Temperature 9,6; 688-699
Zircaloy-2
Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323
zirconium precipitates
Effect of Zirconium on the Magnetic Properties of Nonoriented Semiprocessed Electrical Steel Sheet 9,5; 552-556
ZrO_2-8%Y_2O_3
The Effect of Thermal Barrier Coated Piston Crown on Engine Characteristics 9,1; 103-109

Anelastic Deformation Measurements in Structural Engineering Alloys 9,4; 463-466

Application of Doppler Broadening of Annihilation Radiation Technique to Evaluate the Microhardness Variations during Isochronal Annealing of Al and Al (Mn) Alloys 9,3; 355-358

Application of Shape Memory Alloy Wire Actuator for Precision Position Control of a Composite Beam 9,3; 330-333

Banding of MAR-Aging Steel 9,2; 147-152

Behavior of Fe-Mn-Al-C Steels during Cyclic Tests 9,3; 334-337

Carbide and Hardness Development in the Heat-Affected Zone of Tempered and Postweld Heat-Treated 2.25Cr-1Mo Steel Weldments 9,5; 477-488

Characterization and Sinterability of Oxide-Dispersion Strengthened Nickel Powder Produced by Mechanical Alloying 9,4; 370-378

Chemical Composition Optimization for Austenitic Steels of the Fe-Mn-Al-C System 9,6; 597-602

Composite Coatings of Si_3N_4-Soda Lime Silica Produced by the Thermal Spray Process 9,6; 603-608

Composite Microstructure of Cold-Drawn Pearlitic Steel and Its Role in Stress Corrosion Behavior 9,3; 272-279

Control of Microstructures and Properties of a Phosphorus-Containing Cu-0.6 Wt.% Cr Alloy through Precipitation Treatment 9,6; 623-629

Corrosion Behavior and Tensile Properties of AISI 316LN Stainless Steel Exposed to Flowing Sodium at 823 K 9,1; 98-102

Corrosion Control of Steel-Reinforced Concrete 9,5; 585-588

Corrosion Fatigue Behavior of the High-Strength Magnesium Alloy AZ 80 9,4; 402-407

Corrosion Reactivity of Laser-Peened Steel Surfaces 9,6; 656-662

Corrosion Resistance of a New AL 6013-20 SiC(P) in Salt Spray Chamber 9,3; 338-343

Deformation of Specimen During Laser Surface Remelting 9,2; 138-146

The Degradation of Corrosion Resistance for Al 5083 Alloy after Thermal and Superplastic Forming Processes 9,3; 253-260

The Determination of Initial Blank Shape by Using the One-step Finite Element Method and Experimental Verification 9,2; 183-192

Determining the Effect of Microstructure and Heat Treatment on the Mechanical Strengthening Behavior of an Aluminum Alloy Containing Lithium Precipitation Hardened with the δ' Al_3Li Intermetallic Phase 9,4; 428-440

Diffusion Bonding of a Superplastic Inconel 718SPF Superalloy by Electroless Nickel Plating 9,1; 51-55

Effect of Aging on Oxidation Behavior of Aluminum-Albite Composites at High Temperatures 9,3; 344-349

Effect of Austempering Time on Mechanical Properties of a Low Manganese Austempered Ductile Iron 9,2; 193-203

Effect of Beta Flecks on Low-Cycle Fatigue Properties of Ti-10V-2Fe-3Al 9,2; 222-227

The Effect of Continuous Cooling Heat Treatment on Interface Properties of SK3/Copper Compound Casting 9,1; 81-87

Effect of Delayed Aging on Mechanical Properties of an Al-Cu-Mg Alloy 9,1; 24-27

Effect of Die-Casting Conditions on Viscoelastic Behavior of Mg Alloy 9,3; 297-301

Effect of Geometry on the Performance of Model Metal Matrix Composite Joints and Transitions 9,6; 643-648

Effect of Heat Treatment on Mechanical Properties of Particulate Reinforced Al6061 Composites 9,5; 557-561

Effect of Mechanical Properties Using Different Filler Metals on Wide-Clearance Activated-Diffusion-Brazed Ni-Based Superalloy 9,6; 663-668

Effect of Microstructure and Chemical Composition of Hardfacing Alloy on Abrasive Wear Behavior 9,6; 649-655

Effect of Microvoid Formation on the Tensile Properties of Dual-Phase Steel 9,3; 306-310

Effect of Power Density and Pulse Repetition on Laser Shock Peening of Ti-6Al-4V 9,1; 33-37

Effect of Preheat on Residual Stress Distributions in Arc-Welded Mild Steel Plates 9,1; 7-11

Effect of Prior β-Grain Size on the Hot Deformation Behavior of Ti-6Al-4V: Coarse vs Coarser 9,2; 153-160

The Effect of Thermal Barrier Coated Piston Crown on Engine Characteristics 9,1; 103-109

Effect of Zirconium on the Magnetic Properties of Nonoriented Semiprocessed Electrical Steel Sheet 9,5; 552-556

Effects of Microstructures on Corrosion and Stress Corrosion Behaviors of an Al-12.1 at.% Zn Alloy 9,4; 396-401

Electron Microscopy Structure Study of Laser-Clad TiC-Ni Particle-Reinforced Coating 9,2; 234-246

Environmental Degradation of Materials during Wet Storage of Spent Nuclear Fuels 9,3; 317-323

Environmental Effect on Mechanical Properties of Aluminide Matrix Composites 9,6; 678-682

Erosion of a High-Carbon Steel in Coal and Bottom-Ash Slurries 9,5; 522-529

Estimating Equilibration Times and Heating/Cooling Rates in Heat Treatment of Workpieces with Arbitrary Geometry 9,1; 62-71

Experimental Investigation of the Dynamic Elastic Modulus and Vibration Damping in $MoSi_2$-30%Si_3N_4 as a Function of Temperature 9,1; 116-119

Failure Modes and Materials Performance of Railway Wheels 9,5; 580-584

Flexible Graphite for Gasketing, Adsorption, Electromagnetic Interference Shielding, Vibration Damping, Electrochemical Applications, and Stress Sensing 9,2; 161-163

High-Temperature Corrosion Observed in Austenitic Coils and Tubes in a Direct Reduction Process 9,1; 88-94

Hot Strip Processing of Low Carbon Enameling Grades in the Range of 600 to 700 °C 9,2; 131-137

Improvement of Erosion Resistance of Titanium with Different Surface Treatments 9,5; 571-579

Indentation and Scratch Tests on Sputtered Amorphous CN_x Films Deposited on Plasma-Nitrided Ti-6Al-4V 9,5; 499-505

Induction Heating of Semisolid Billet and Control of Globular Microstructure to Prevent Coarsening Phenomena 9,1; 12-23

Influence of Nonmetallic Inclusion Characteristics on the Mechanical Properties of Rail Steel 9,6; 700-709

Interface in Mechanically Fastened Steel Joint, Studied by Contact Electrical Resistance Measurement 9,1; 95-97

An Investigation of the Reduction in Tensile Strength and Fatigue Life of Pre-Corroded 7075-T6 Aluminum Alloy 9,4; 441-448

An Investigation on Quench Cracking Behavior of Superalloy Udimet 720LI Using a Fracture Mechanics Approach 9,2; 204-214

Investigation on the Constitution and Mechanical Characteristic of Composite Containing Silicon-Carbide Produced by Electroless Co-deposition 9,4; 379-385

An Investigation on the Elastic Modulus and Density of Vacuum Casted Aluminum Alloy 2024 Containing Lithium Additions 9,3; 266-271
